

AEGIS VO Acceptable Use Policy (as of 2006-08-08)

This Acceptable Use Policy applies to all members of AEGIS Virtual Organization, hereafter referred to as the VO, with reference to use of the LCG/EGEE Grid infrastructure, as well as the AEGIS National Grid Infrastructure, hereafter referred to as the Grid. The Scientific Computing Laboratory of the Institute of Physics Belgrade owns and gives authority to this policy.

The goal of the VO is to:

- Provide seamless access to the existing computing and storage resources in Serbian academic institutions to the whole Serbian scientific community.
- Facilitate collaboration among different research communities in Serbia.
- Promote the development of new Grid applications and communities in Serbia.

Members and Managers of the VO agree to be bound by the Grid Acceptable Usage Rules, VO Security Policy and other relevant Grid Policies, and to use the Grid only in the furtherance of the stated goal of the VO.
